REASONS FOR ALLOWANCE

This action is in response to the After Final Remarks filed on June 30th, 2009.

1. Claims 1 and 3-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Referring to independent claims 1, 8, 12 and 13, the prior art of record taken alone and/or in combination with each other fails to teach and/or fairly suggest the limitation of "return a pointer to the consuming process indicating a location in the buffer memory from which to read the entire grain when the addresses do not wrap around inside the grain, or a pointer indicating a location of the auxiliary memory region from which to read the entire grain, when the addresses wrap around," in combination with other recited limitations.

Nadehara discloses a circular buffer where in the case of an overflow, the first few entries of the buffer are copied in the space immediately following the end of the buffer for wrap around conditions. However, *Nadehara* fails to teach "return a pointer to the consuming process indicating a location in the buffer memory from which to read the entire grain when the addresses do not wrap around inside the grain, or a pointer indicating a location of the auxiliary memory region from which to read the entire grain, when the addresses wrap around."

Sample discloses a method for emulating a circuit design for a reconfigurable hardware array such as an FPGA, as related to claim 11. However, *Sample* fails to

teach "return a pointer to the consuming process indicating a location in the buffer memory from which to read the entire grain when the addresses do not wrap around inside the grain, or a pointer indicating a location of the auxiliary memory region from which to read the entire grain, when the addresses wrap around."

Further references cited, such as *Swan*, teach processing video data in grains through a ring buffer. However, they fail to teach, alone or in combination, "return a pointer to the consuming process indicating a location in the buffer memory from which to read the entire grain when the addresses do not wrap around inside the grain, or a pointer indicating a location of the auxiliary memory region from which to read the entire grain, when the addresses wrap around."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUSHAR S. SHAH whose telephone number is (571)270-1970. The examiner can normally be reached on Mon-Fri 7:30am-5pm.
